EXAMINER'S AMENDMENT & STATEMENT OF REASONS FOR ALLOWANCE

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Ms. Kari Footland on 14 July 2008.
3. The application has been amended as follows:
 1. (Currently Amended) A drum washing machine, comprising:
 - a key input unit receiving an input from a user;
 - a water tub;
 - a rotary tub rotatably provided in the water tub;
 - a detergent feed pipe having a first end connected to the water tub and a second end disposed at an inlet of the rotary tub;
 - a control unit determining whether a detergent used is a powdered detergent or a liquid detergent based on the input from the user; and
 - a detergent feed unit to feed the detergent contained in the water tub into the rotary tub through the detergent feed pipe, the control unit controlling the detergent feed unit to

Art Unit: 1792

dissolve the detergent before feeding the detergent into the rotary tub in response to a determination from the control unit that the detergent is a powdered detergent;

wherein the detergent feed unit comprises a control unit to drive a pump provided at the detergent feed pipe to substantially dissolve the powdered detergent and then feed the dissolved powdered detergent into the rotary tub.

Cancel claims 2 and 5 (incorporated into claim 1).

6. (Currently Amended) The drum washing machine according to claim [[5]]
1, further comprising:

a detergent dissolution space formed at the detergent feed pipe to temporarily store the detergent; and

a water feed valve;

wherein the control unit opens the water feed valve to feed a set amount of water into the water tub after the powdered detergent is moved into the detergent dissolution space.

9. (Currently Amended) The drum washing machine according to claim [[5]]
1, wherein the control unit drives the pump to reciprocate the detergent contained in the water tub between an inside of the water tub and the detergent feed pipe to dissolve the powdered detergent.

Art Unit: 1792

10. (Currently Amended) The drum washing machine according to claim [[5]] 1, wherein the key input unit has a powdered detergent button, the control unit determining whether the detergent contained in a lower portion of the water tub is the powdered detergent according to the powdered detergent button being selected in the key input unit.

12. (Original) The drum washing machine according to claim [[5]] 1, wherein the control unit drives the pump to clean the detergent feed pipe in response to the detergent contained in the water tub being the powdered detergent.

Cancel non-elected claims 13-18.

19. (Currently Amended) A drum washing machine, comprising:
an key input unit receiving an input from a user;
a water tub;
a rotary tub provided in the water tub;
a control unit determining whether a detergent used is a powdered detergent or a liquid detergent based on the input received through the key input unit; and
a detergent feed unit to feed the detergent contained in the water tub into the rotary tub, the control unit causing the detergent feed unit to drive a pump provided at the detergent feed pipe to substantially dissolve the detergent before feeding the

Art Unit: 1792

detergent into the rotary tub in response to a determination from the control unit that the detergent is a powdered detergent.

21. (Original) The drum washing machine according to claim 19, ~~further comprising a~~ wherein the pump to reciprocate reciprocates the powdered detergent in and out of the water tub to dissolve the powdered detergent.

Cancel non-elected claim 22.

23. (Currently Amended) A drum washing machine, comprising:
a key input unit receiving an input from a user;
a water tub;
a rotary tub; ~~and~~
a spraying unit; and
a control unit ~~causing a pump to dissolve a detergent contained in the water tub in response to a determination by the control unit, based on the input received through the key input unit, that whether the detergent is powdered or liquid, causing a pump to sufficiently dissolve a detergent contained in the water tub in response to the determination by the control unit,~~ and then causing the spraying unit to spray the dissolved detergent into the rotary tub by the spraying unit to soak a center of a laundry load.

Art Unit: 1792

24. (Currently Amended) A drum washing machine, comprising:

a key input unit receiving an input from a user;

a water tub;

a rotary tub provided in the water tub; and

a detergent feed unit;

a control unit making a determination based on the input received from the key input unit as to whether a detergent is a first type of detergent or a second type of detergent and selectively causing the first type of detergent to be dissolved in the detergent feed unit before being fed from the water tub to the rotary tub without being dissolved in the detergent feed unit;

wherein the detergent feed unit comprises a control unit to drive a pump provided at the detergent feed pipe to substantially dissolve the powdered detergent and then feed the dissolved powdered detergent into the rotary tub.

Allowable Subject Matter

4. Claims 1, 3, 4, 6-12, 19-21, 23 & 24 are allowed.

5. The following is an examiner's statement of reasons for allowance: The closest prior art of record, U.S. Patent No. 4,986,093 to PASTRYK & U.S. Patent No. 5,233,718 to HARDAWAY, fails to teach or reasonably suggest the claimed invention. Specifically, PASTRYK & HARDAWAY both disclose a washing machine with water tub, rotary tub, plural detergent supplies, a detergent feed pipe with pump and spraying means. However, PASTRYK & HARDAWAY fail to teach or reasonably suggest the claimed

washing machine with a key input for powdered or liquid detergent, and a control unit which substantially dissolves the powdered detergent by operating a pump in response to the control unit determining that the selected detergent is powdered detergent. For at least the foregoing reasons, claims 1, 3, 4, 6-12, 19-21, 23 & 24 are believed to recite patentable subject matter.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
